EDUCATION

London School of Economics and Political Science (LSE) Sep 2026 - Sep 2027
MSc Financial Statistics (Research)

London School of Economics and Political Science (LSE) Sep 2023 - Jun 2026
BSc Actuarial Science | Top 10% | First Class Honours

RESEARCH & PROFESSIONAL EXPERIENCE

Central University of Finance and Economics, School of Insurance Jun 2026 - Sep 2026
Research Assistant

- Constructed four positive and negative tail-event streams from daily Fama-French Money and HiTec returns; designed a four-dimensional discrete-time multivariate Hawkes hazard model with lagged VIX in the baseline intensity to separate within-industry and cross-industry excitation from common market stress.
- Defined attribution and forecasting tests using excitation decay, spectral radius and out-of-sample log and Brier scores; completed the literature review and reproducible empirical workflow, with estimation and robustness tests in progress.

Time with Yuhui Jun 2025 - Sep 2025
Data Operations Intern

- Analysed GMV, engagement and conversion across 50+ livestreams; identified priority customer segments and proposed improvements that increased GMV by 15%.
- Produced weekly dashboards and insight reports to improve user retention and advertising ROI.
- Built an Excel risk-scoring model for 1,000+ suppliers, combining safety and compliance checks to reduce high-risk partnerships by 20%.

NetEase Youdao Jun 2024 - Sep 2024
Platform Operations Intern

- Cleaned and consolidated sales and inventory data across e-commerce channels, raising new-product ROI by 1.7%.
- Analysed Pinduoduo marketplace data in Excel and Tableau to refine pricing and promotion, increasing store satisfaction by 17.5% and sales by 12.3%.
- Coordinated inventory transfers, fulfilment and distribution through ERP, improving inventory turnover efficiency by 15.8%.

China Life Jul 2023 - Sep 2023
Research Assistant

- Built a linear regression model of age and claim rate using data from 379 policyholders to support premium pricing.
- Produced Excel visualisations and statistical reports, assessed model significance and supported product positioning.

PROJECTS & LEADERSHIP

4th Actuarial Science, Quantitative Finance & Risk Management Conference, CUF Jul 2026
Participant

- Engaged with research presentations on Hawkes processes, stochastic-intensity models and other stochastic processes, focusing on actuarial applications.
- Developed an understanding of event clustering, self-excitation, exogenous shocks and risk contagion in insurance losses, financial-market tail events and systemic-risk analysis.

LSE Statistical Challenge Jan 2025 - Mar 2025
Team Lead

- Modelled volatility using 20 years of daily FTSE 100, S&P 500 and Nikkei 225 prices, applying GARCH(1,1) and fractional Brownian motion.
- Compared models using AIC, BIC and log-likelihood; GARCH(1,1) improved average fit by approximately 15%.

World Youth Economic Forum Jul 2021 - Aug 2021
Team Lead

- Led an eight-person team to top three finishes across three pitches and won the simulated investment competition; earned a national silver medal after five rounds of operational assessment.

SKILLS & ADDITIONAL INFORMATION

Languages: Mandarin Chinese (native); English (fluent; IELTS 7.5 overall, 8.0 speaking)

Technical skills: Microsoft Office (advanced); Tableau, R and SQL (basic)

Awards: UK Senior Mathematics Challenge (Gold Award); European Economics Olympiad (Merit Award)

Volunteering: Mother English Programme; Singapore Red Cross (Youth Leadership/Humanitarian Volunteer Programme)
